

- A self-engaging Velcro strap with anti-slip finish on the other side.
- Fixes inner tubes plus tire lever and/or spare parts under the saddle.
- Snap-fastener secures the strap on saddle rail to facilitate item loading and removal.

**Instructions of Use :**

- Attach snap-fastener onto the saddle rail, then thread the strap through under the saddle.
- Place the items under the saddle and wrap strap around.

**Note:**

To establish proper engagement,  
please ensure that :

- the Strap is pulled tight around the items.
- the Velcro has an engagement area of 6cm or more when bent over from the loop. Trim off any excess if necessary.
