It has to feel and also look effortless.

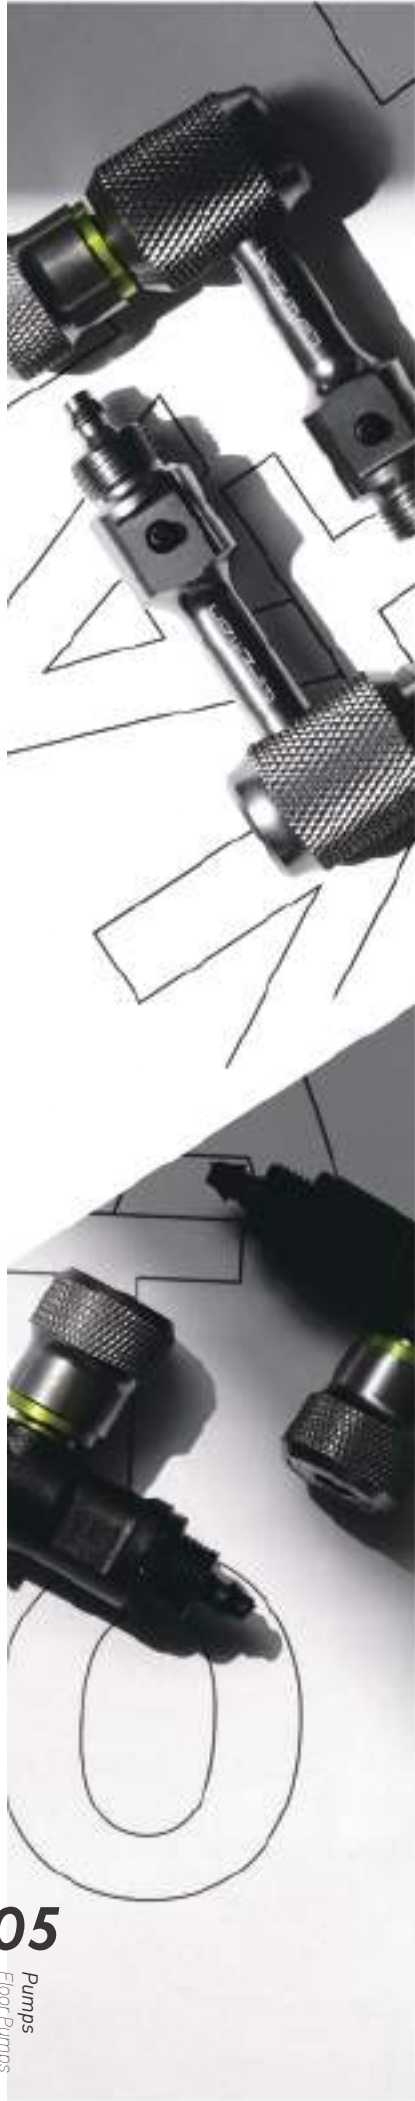

We wanted to make inflating a tire less of a hard work. Sounds basic and also rather cliché, but it is all we ever wanted.

We started from a CNC machined barrel. A smoother inner surface offers velvety movement of the piston.

We then added a flatter check valve and carefully calculated spring rate to the bottom of the barrel. The greater surface area in contact with airflow allows the valve to be pushed further, increasing rate of airflow.

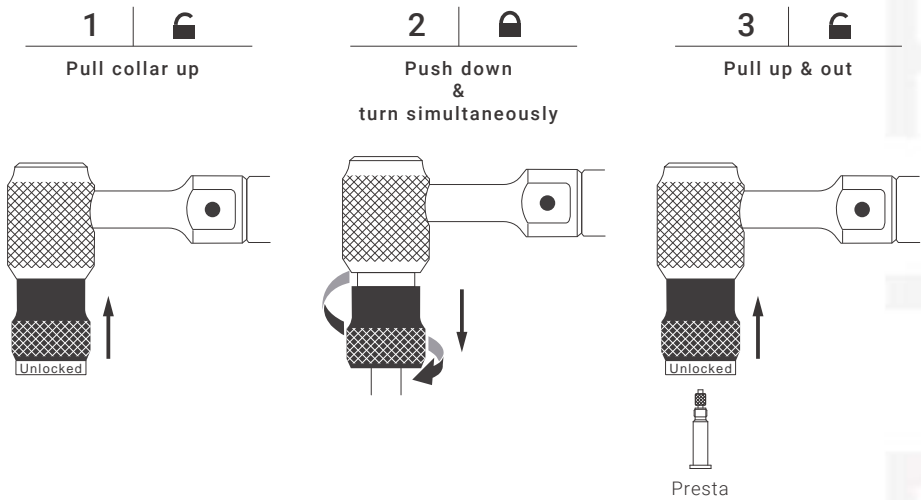

Patented valve head offering quick and precise engagement; tripod like base and tapered handle. Everything and anything for The Pump.

Snap-It Elite Presta

- Fully CNC machined Presta-specific valve head offering a quick and precise engagement with Presta valves.
- Features pressure bleed button (CAD) for adjustment during inflation and does not blow off under high pressure.
- Comes with 2 x hose adapters :
Black O.D. Ø8.5 x I.D. Ø3.5-4 mm & Grey O.D. Ø10 x I.D. Ø3.5-4 mm

We are huge fans of compatibility.

The joy of having one tool that works for multiple specs, especially without any switching or adding of parts has us constantly looking for rooms for integration of functions.

QR or 12mm Thru-axle? Both.

The free-spinning and side-shifting pulley wheel, allows shifting of the derailleur and the high polymer spacer provides abrasion protection against dropout surfaces. Pretty sweet.

Rear Hydration System

- Modular structure with multiple mounting holes allows for different attachment possibilities and orientations
- The arms mount onto the saddle rail at two adjustable angles to fit saddles of different shapes.
- Streamlined aerodynamic framework minimises air resistance by hiding behind the rider's shadow.
- Constructed from 6061 aluminium with a maximum load of 2.5 kg and a total weight of only 105 g including hardware.

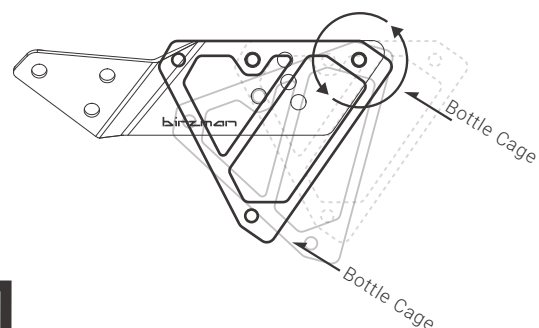

Carries **two bottle cages** on the sides at **three angles** when extended, plus additional accessories if needed.

Optional **Uncage Repair Kit**
attachment at rear end.
(BM17-UNCAGE-RP-KIT)

Alternatively, bracket can be stowed to carry a **single bottle cage** at the rear end at **two angles**.

It starts with a sketch...

Roadster SB /

The making of samples.

*Hands, eyes, a ruler, a pencil,
and a pair of scissors.*

Stitch by stitch.

*Closely monitored.
Every corner, every line.*

*Check and recheck.
Only to make sure every stitch, every corner,
and every line is accurate.*

*A difference in a matter of millimeters
could mean restarting the process completely.*

It's all in the details.

Ready and waiting.

Adding the finishing touches.

Trimming off the surplus.

The mould.

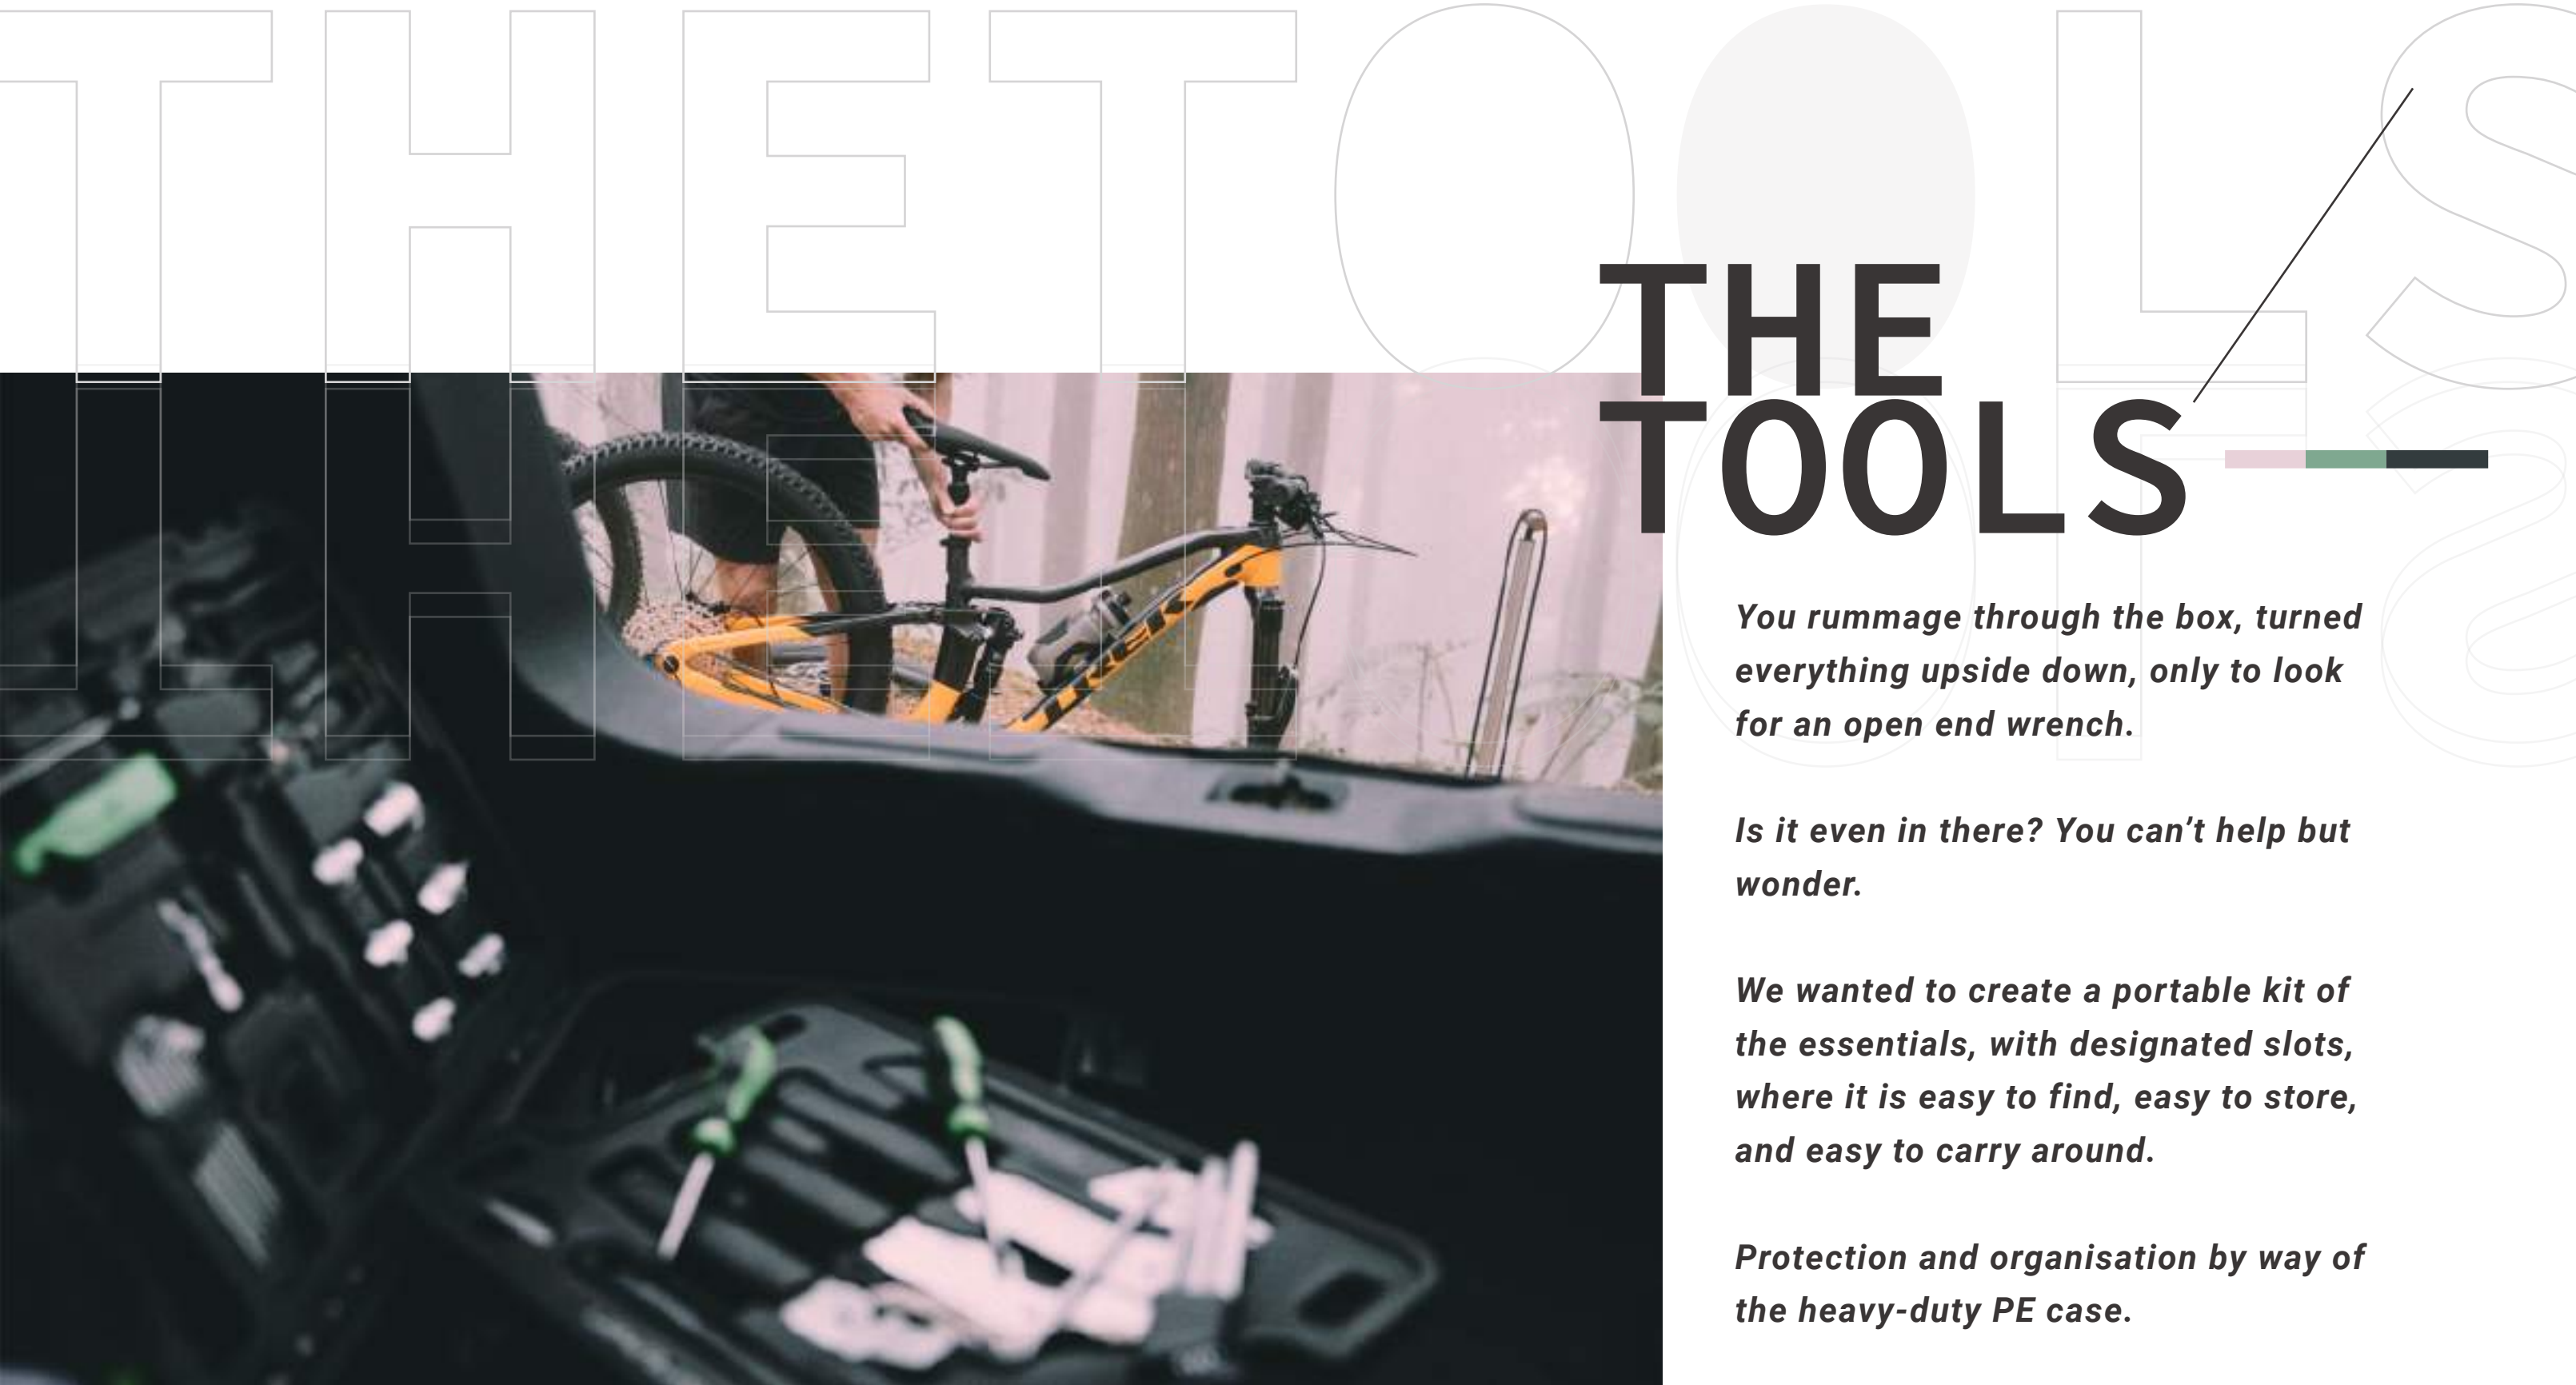

From sheet...

to box...

All the moulds.

THE TOOLS

You rummage through the box, turned everything upside down, only to look for an open end wrench.

Is it even in there? You can't help but wonder.

We wanted to create a portable kit of the essentials, with designated slots, where it is easy to find, easy to store, and easy to carry around.

Protection and organisation by way of the heavy-duty PE case.

Double-ended Piston Pusher

BM23-DPP

Functions

- Simultaneously presses pistons back into the calliper with parallel and symmetrically moving panels for brake pad replacements.
- Compatible with two- and four-piston brake callipers with an opening of 15 mm/35 mm or more in width.

Material

Alloy Steel

Size

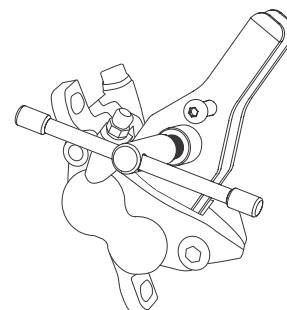

130 x 110 x 35 mm

Weight

214 g

Patent

Taiwan M634915

2

Disc Brake Piston Pusher

BM20-DBPP

Functions

- Simultaneously presses pistons back into the calliper with parallel and symmetrically moving panels for brake pad replacements.
- Compatible with two- and four-piston brake callipers with an opening wider than 23 mm.

Material

Aluminium 6061

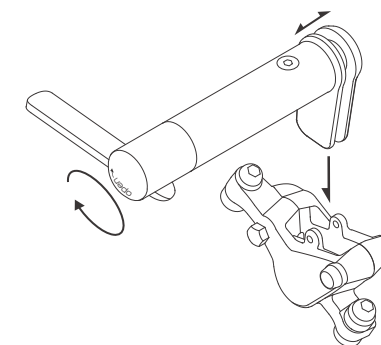

Alloy Steel

Size

Ø23 x 121 mm

Weight

3

Flare Nut Wrench 7&8

BM22-FW-7-8

Functions

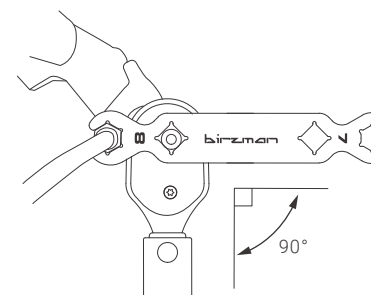

- Double-sided 7 & 8 mm openings for use with hexagonal fasteners on hydraulic brake systems.
- Enables precise engagement with delicate fasteners, minimising risks of stripping the edges.
- Features ¼" Dr. slots for use with a torque wrench.

Material

Alloy steel

Size

90 x 15 x 4 mm

4

Housing and Cable Cutter

BM11-ST-CC02-K

Functions

- Features an integrated awl for restoring cut housing ends and clear the way for smooth cable operation.

Material

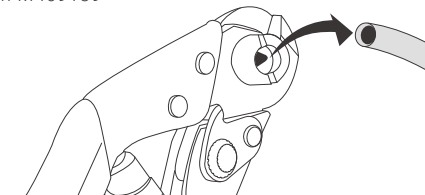

Hardened Steel / High polymer

Size

7.5"

Patent

Taiwan M409139

5

Cable Pliers

STORAGE & DISPLAY

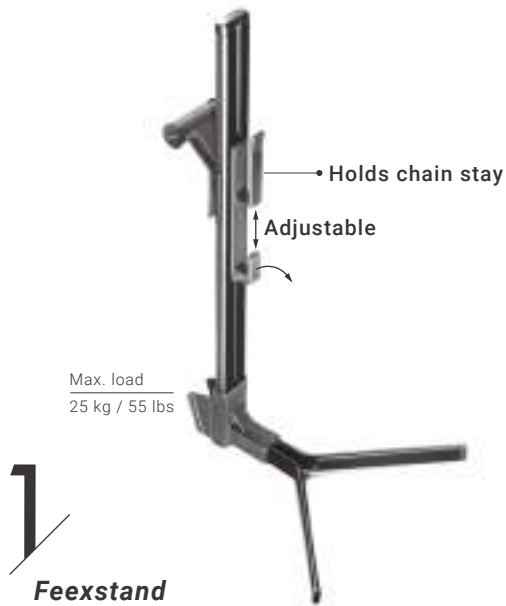

Having a repair stand at home would be handy, but it is bulky and takes up so much space. When we do not all have huge garages.

How often do you really need the full use of it?

It would probably make sense to combine a repair stand with a bike stand. That way you most definitely would use the stand a lot more frequently, we thought, and we came up with the Feexstand.

Standing upright as a storage stand, the height adjustable hook holds the seat stay and chain stay of a bike for storage and display.

Feexstand

BM20-FX-STAND

Functions

- Equipped with adjustable components and interchangeable end caps to accommodate frames and wheels of various sizes.
- Compatible with road and mountain bikes, Ø5x100 mm Quick Release and Ø12x100 / 15x100 / 15x110 / 20x110 mm Thru Axles.

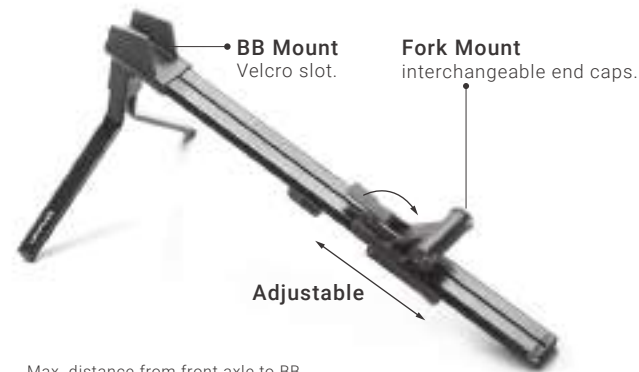

Material

6061 Aluminium / High polymer / Steel

Size

430 x 410 x 745 mm

Tilted to form a 3-point standing repair stand, the BB mount and slidable fork mount secure the bike in place for simple repair and maintenance tasks, including cleaning and washing.

A person is riding a bicycle through a forest. The image is taken from a low angle, showing the front of the bicycle and the rider's legs. The forest is dense with tall trees, and sunlight is filtering through the canopy, creating a hazy, golden light. The rider is wearing dark clothing. The overall mood is serene and contemplative.
