

- A CO₂ set allowing safe storage of valve head with a cartridge when not in use.
- The grip limits the length of the threads, preventing valve head from accidentally piercing the cartridge.
- To use the set for inflation, disassemble, turn grip upside down, then place cartridge into grip and connect valve head.
- Features a loop for Velcro straps, for an easy and secure attachment onto the bike.
- Releases CO₂ with a simple press down on the valve head.

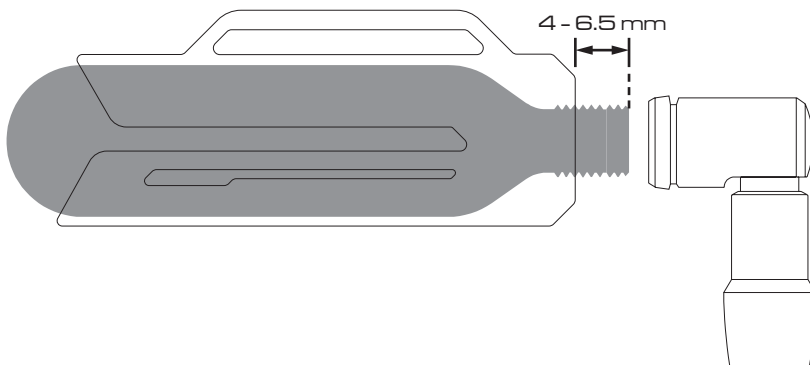

Storage

Inflation

- Compatible with 16 / 20 g threaded CO₂ cartridges, with threads protruding 4 - 6.5 mm from the grip.

Caution:

- Tightly screw the CO₂ cartridge onto the valve head before inflation.
DO NOT unscrew the cartridge during use and before it is empty.
- Please avoid contact with the CO₂ cartridge during inflation, hold on to the grip for support.
- DO NOT use the grip with valve heads other than the one included.
